BAKD Roadmap (v1.0.2)

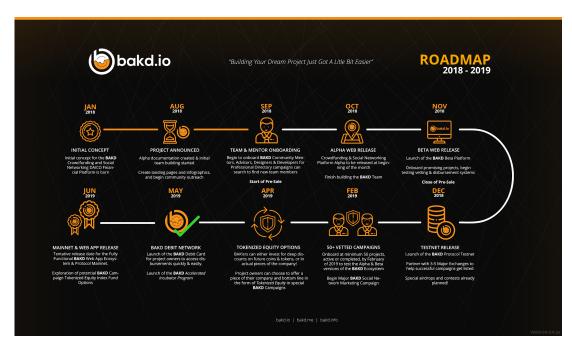

Overview

Dates are tentative and subject to change without notice*

BAKD is a platform for entrepreneurs and projects of any size to network, raise funds, find team members, as well as learn -- all in one place while they build out their next great idea.

BAKD not only gives startups the capital they need to succeed, but we instill a sense of confidence among our members, all while providing them the tools they'll need to succeed. All of this is made possible by way of the **BAKD** Cryptocurrency Protocol. **BAKD** Coins are used to both invest in campaigns, as well as to pay campaign disbursements to project/campaign owners.

BAKD is a place where investors can feel safe investing in cryptocurrency startups. No longer will we have to wonder where our hard-earned money is going, or if a project is really meeting it's deadlines and milestones. With **BAKD**, if project milestones are not met, and/or the project becomes abandoned, all remaining investor funds are returned to the original investor. Invest with confidence
